

Transceiver ERA-18

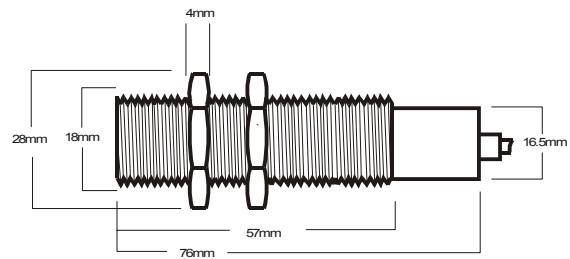

Identification Systems

Description

The ERA-18 Transmitter/Receiver used with a BALOGH Control Board allows Reading and/or Writing of OMA-18 TAGS.

Reading/Writing System

The ERA-18 can be Read or Written to when used in conjunction with an approved BALOGH Control Board and Transceiver.

Connection is made between a BALOGH Control Board and ERA-18 Transceiver with a 4 conductor cable (included is a 2 meter cable) with wiring connections as follows:

Wire	Connection
Brown	+V DC
Green	Output
Yellow	Input
White	0V DC

For additional assistance on product information and approved product combinations call 248-486-RFID (7343).

Please consult the Assembly Manual for mounting/positioning recommendations.
